Shop one day at a time, or as little as once a month. Donâ€™t get stuck paying higher prices. A: I have not tried to do exactly what you want but I do have a function that will take a file as input and will return a folder containing all the files given to it: function createDir(\$file,\$dir){ \$dirs = scandir(\$file); \$newdirs = array(); foreach(\$dirs as \$dir){ if(is\_dir(\$file.\$dir)){ \$newdirs[] = \$dir; } } return \$newdirs; } function explode\_directories(\$file){ \$new\_dir = explode("/", \$file); \$file\_directories = array(); foreach(\$new\_dir as \$dir){ \$file\_directories[] = \$dir; } foreach(\$file\_directories as \$dir){ \$dirs = explode("/", \$dir); if(is\_dir(\$file.\$dir)){ if(is

Ask HN: Why no freshness? - gsaines This seems to be a common issue, but I'm still looking for some consensus on it. ===== deepinsand I see this all the time for sites with high traffic and a large number of visitors. I assumed that's what we'd see here on Hacker News. The real reason is that even if you're a developer and have some free time on your hands, you'll want to solve the problem of making your stuff better, rather than just posting it. ----- gus\_massa Meh. I can't find any explanation yet. I'd like to get an explanation. ----- dozzie Because freshness already implies the notion of some sort of "freshness" that you are implementing through some filter, isn't it? Chromatin immunoprecipitation and expression analysis of bone morphogenetic protein receptors in induced pluripotent stem cell-derived mesenchymal stem cell sheets. The pluripotency of induced pluripotent stem cells (iPSCs) provides a unique opportunity to study human embryonic development. We generated iPSC-derived mesenchymal stem cells (MSCs) as a model system for human embryonic stem cell (hESC) and iPSC differentiation studies. By using inducible green fluorescent protein (iGFP) reporter assay, we identified the critical stage for the efficient isolation of MSC sheets, during which the cells appeared to have an appropriate cell morphology for MSC isolation. Furthermore, to clarify the function of the BMP signaling pathway in MSC sheets, we analyzed the expression of a series of BMP receptors in MSC sheets using chromatin immunoprecipitation and expression analysis (ChIP/ECA). We isolated MSC sheets from iPSCs at Days 15 and 21, and performed ChIP assays to analyze the gene promoters of BMP receptors type 1, 2, 4, and 6. We found that the expression levels of BMP4, BMP6, and BMP receptor type 6 were increased after 21 days of culture, while expression levels of BMP receptor type 2 and receptor 3e33713323
