Elden Ring is a new fantasy action RPG where a group of heroes attempt to revive a kingdom under siege in a distant land called "The Lands Between." The protagonist is a nobleman named Tarnished under the Elder of a race called "Elden". After an attack by a sinister force called "Void", the evil are born in the Lands Between, and the heroes are summoned from the Earthly Realm to the world above. Because you have only one life, and the world can be easily destroyed, you must strive to defeat the evil completely and save the world. Following the success of the Vana'diel Online project for the "Chrono Trigger" game series and the "Eorzea" project for the "Final Fantasy XV" game series, we are leading the development of a new fantasy action RPG. The main goal of the "Elden Ring" project is to create an online fantasy RPG with a seamless, fun, and deep RPG battle system, as well as a vast open world with various situations and dungeons. We also aim to restore the feeling of freedom in an RPG game. In an RPG game, there are many things to unlock, but these items are not obtained by grinding in endless battles. -Story: An epic drama told in fragments. An online fantasy RPG with a variety of stories that can all be enjoyed when playing in co-op multiplayer. A world full of a diverse range of decisions awaits you. [Game Features] 1. A Vast World Full of Excitement A vast world where open fields with a variety of situations and huge dungeons with complex and three-dimensional designs are seamlessly connected. When you travel on your horse, you will encounter challenges, and when you fight monsters, you will be able to make smart decisions to expand your world. You will be able to advance further than ever through different circumstances and situations. 2. A World Where the Investigation of Things Is Rewarded From the detailed character design to the whole environment, every part of the game is designed with a sense of wonder, so that you can deeply feel the joy of coming across something that you have never encountered before. While playing, you will think, "What if this was like a game?" and you will remember what the game is like. 3. An RPG Battle System where Everything Comes Together An action RPG battle system

What's new:

? We should take a look at Freeroll wagering and blackjack. Neither of these are currently available for sports betting. As we probably agree on that you can't have a mainstream sportsbook without staking, you should have your best wagering odds (as high as possible for exciting bets like this one) and, if you run them straight, basically half of all your rake. But this is all part of the new legitimate wagering laws, which cannot be circumvented by the casino methods of sports bookies. As we can see we have legalized sports in the states that already have a sustainable sportsbook infrastructure, while other states opt for a webbased casino app with few sports offerings. If we all want sports games and even some casino games, this needs to be a part of our, as a state or as a nonprofit if this is a goal to be achieved, mindset. The goal has more to do with money than any other emotion and we, as a society are literally being driven into reverse rut, but to make a choice to make these possible requires an opinion. So how do we start that opinion? Well, we can start small and try to make some kind of sportsbook for fun and for practice. Let's make wagers about the Superbowl and the Blackjack and start to make a bankroll once again. And we start from here! How do we get to the big leagues? Let's admit we have an obligation to start small. After the initial program development starts, the fun and funds will return full circle, as we will have to pay for eventual expansion expenses to the legal sports betting infrastructure. We will be open for project ideas, as we will need some folks to help us get there... and help build the board and organize everything. Curious to learn more? Just send an email to: haslemamab@lanta.net to begin the discussion of how to help us on our way!
