I have a Prologue 500 digital scanner and am looking for the software from Radio Shack to transfer my data to the Pro-668. However, no CD is included. I have: Iscan software, Computer,

and a USB cable. I went to the iScan website and I am lost as to whether I have all of the software and/or website correct. I have also tried the Pro-668 user manual to find out if I can just download the data from my PSR-800 to the Pro-668, (like a clone), and this is also not clear. Thanks for any help provided! A: You need to use the free iScan software that comes on the CD with the scanner. If you haven't got the software loaded, you should be able to download it for free from the iScan website. You may have to go there and download the software for Windows which you'll then load into your computer.

Alternatively you can get the software from a computer store, which may have it in the toolbox section. 1 . L e t a (b) = - 4 * b + 5 . L e t w (i) = - 2 * a (i) + 5 * c (i) . L e t y (v) = - 5 * v . L e t x (n) = 6 * w (n) 6d1f23a050
